WAYS TO HIRE

4

CIVIL WORKS & UNDERGROUND DELIVERY 7 ROLES

The core workforce for groundworks, public infrastructure and underground networks.

Groundworker	Trenches, excavations, cables, utilities, drainage, compaction and excavator support.
Civil engineering operative	Road foundations, drainage, gullies, kerbs, surfacing and public infrastructure.
Paver	Installation and reinstatement of blocks, slabs, kerbs, channels and modular paving.
Drainage operative	Installation, replacement and repair of drains, manholes, gullies and connections.
Cable and duct layer	Installs cables, utilities and ducts and supports network and service connections.
Excavator operator	Excavator, mini excavator or mobile plant, matched to task and competence.
Working foreman - infrastructure	Allocates tasks and controls progress, safety and daily coordination.

TELECOM & FIBRE 7 ROLES

From route to active connection. Groundworks and network installation remain separate trades in the same programme.

Data distribution technician	Installs, checks and commissions parts of data and telecom networks.
Fibre technician	Installation, termination, testing and handover of fibre networks.
Fibre splicer	Splices fibres, completes distribution points and records links and test results.
Fibre cable blowing operative	Blows cables or microcables into ducts and controls pressure and route conditions.
FTTH connection technician	Completes connections from network point to homes or business premises.
Telecom fault technician	Locates, analyses and repairs faults in telecom and data networks.
Cable testing and fault specialist	Performs OTDR or other testing for diagnosis, quality and handover.

PREPARATION & PROJECT CONTROL 5 ROLES

Control of delivery and handover: preparation, supervision, engineering, utility data and setting out.

Infrastructure / telecom works planner	Prepares schedules, people, materials, drawings, permits and files.
QUALIFICATION REQUIRED	

Infrastructure / telecom site supervisor QUALIFICATION REQUIRED	Directs crews, safety, quality, progress, stakeholders and subcontractors.
Telecom / route engineer QUALIFICATION REQUIRED	Designs routes, capacity, connections, crossings and technical documentation.
Utility-information coordinator QUALIFICATION REQUIRED	Manages Dutch KLIC utility data, risks, discrepancies and handover to field teams.
Setting-out engineer QUALIFICATION REQUIRED	Sets out levels, lines and positions and checks completed works.

On request means the role is supplied subject to confirmation. **Qualification required** means the role calls for a certificate, and a certificate does not automatically grant authority.

FOUR WAYS TO WORK WITH US

01

Temporary staffing

Flexible capacity aligned with the assignment and schedule.

Peaks, absence, flexible shifts and short-term deployment.

02

Secondment

Skilled people for an agreed period and scope.

Longer assignments, projects and continuity.

03

Recruitment & selection

Targeted recruitment for a sustainable permanent match.

The candidate joins the employer directly.

04

Project teams & flex pools

A scalable deployment structure with planning and quality control.

Multiple roles, sites, shifts or recurring demand.

REQUEST STAFF

Tell us what you need and the Workforce team will contact you to agree the details.
