

SECTOR 11 OF 12

MARITIME, PORT & OFFSHORE

Terminal, port, inland and sea-going shipping, marine engineering and offshore profiles, with separate qualification routes.

ROLES

23

GROUPS

3

WAYS TO HIRE

4

PORT & TERMINAL 7 ROLES

Capacity for quay, yard and terminal. Equipment evidence is assignment-specific, never a general authorisation.

Port Operative	Loads, unloads, moves and checks cargo at quay or vessel to work and safety instructions.
Terminal Operator	Supports yard, gate and terminal processes, inspections, scanning and records.
Lasher / Lashing Specialist	Secures or releases containers and project cargo to vessel and terminal procedures.
Port Crane Operator	Operates the appropriate port or handling crane; machine type and evidence matched first.
Reach Stacker Operator	Moves and stacks containers within route, capacity and terminal rules.
Straddle Carrier Operator	Moves and positions containers at equipped terminals after site instruction.
Terminal Tractor Driver	Moves trailers, chassis and cargo units between quay, yard and logistics zones.

INLAND, SEA-GOING & MARINE ENGINEERING 9 ROLES

Separate qualification routes. Inland and sea-going occupations are not interchangeable.

Inland Navigation Boatman	Deck, maintenance, mooring and cargo duties at the applicable operational level.
Inland Navigation Helmsman	Navigational and operational duties within the valid qualification and manning plan.
Inland Boatmaster	Commands an inland vessel within the valid Union qualification and entitlement.
Deck Rating / Able Seafarer Deck	Deck, watchkeeping, mooring and maintenance duties to STCW competence and flag.
Deck Officer / Mate	Keeps navigational watch and carries deck responsibility within valid STCW competency.
Sea-going Master	Holds nautical command within STCW, flag-state and company requirements.
Marine Engineer Officer	Operates, maintains and monitors propulsion and technical systems.
Marine Mechanic	Installs, maintains and repairs mechanical systems onboard, at a yard or offshore.
Marine Electrician	Installs, tests and maintains vessel electrical systems within authorisation.

OFFSHORE, DREDGING & SUBSEA 7 ROLES

Technical and marine profiles for work at sea. Safety training is not trade authorisation.

Offshore Mechanical Technician	Maintains and installs mechanical systems on a platform, vessel or structure.
Offshore Electrical Technician	Electrical maintenance, inspection and fault work within voltage and asset rules.
Wind Turbine Technician	Maintains or installs turbines; OEM, task, GWO modules and experience must match.
Rigger	Prepares lifting work, checks accessories and guides loads within the lift plan.
Banksman / Slinger Signaller	Slings loads and communicates with the crane operator to the lift plan and signals.
Offshore Crane Operator	Operates offshore lifting equipment within crane type, load chart and asset rules.
ROV Pilot Technician	Operates and maintains remotely operated vehicles for inspection, survey or intervention.

FOUR WAYS TO WORK WITH US

01 Temporary staffing Flexible capacity aligned with the assignment and schedule. Peaks, absence, flexible shifts and short-term deployment.	02 Secondment Skilled people for an agreed period and scope. Longer assignments, projects and continuity.	03 Recruitment & selection Targeted recruitment for a sustainable permanent match. The candidate joins the employer directly.	04 Project teams & flex pools A scalable deployment structure with planning and quality control. Multiple roles, sites, shifts or recurring demand.
