WAYS TO HIRE

4

PRODUCTION, ASSEMBLY & PACKING 8 ROLES

Shop-floor people who keep products moving. Food, metal, plastics and pharma are filters, not duplicate job titles.

Production Operative	Supports production, performs manual or machine-assisted tasks and checks own work.
Assembly Operative	Builds parts or modules to instructions, drawings, sequence and quality standards.
Packing Operative	Packs, checks, labels and prepares products for the next production or logistics step.
Sorting Operative	Sorts products or materials by quality, size, type, defect or recovery route.
Materials Preparation Operative	Prepares raw materials, packaging, recipes and resources for a controlled start.
Batching & Mixing Operative	Weighs, doses and mixes raw materials to recipe and recording requirements.
Cleanroom Production Operative	Production, assembly or packing within defined gowning, hygiene and recording rules.
Finishing Operative	Trimming, sanding, polishing, repair, rework or visual final inspection.

MACHINE & PROCESS OPERATIONS 6 ROLES

Operators matched to machine, line and process. Operator is not a universal authorisation.

Machine Operator	Sets, runs and changes over a machine and handles agreed first-line deviations.
Line Operator	Monitors an integrated line, coordinates process steps and adjusts pace and quality.
Process Operator	Monitors and controls a process, records values and intervenes within operating limits.
Field Operator	Checks plant outside the control room, completes rounds and takes samples.
Control Room Operator	Monitors trends and alarms through DCS or SCADA and coordinates actions.
Packaging Operator	Sets and monitors packing, filling or labelling lines including coding and sealing.

QUALITY, PLANNING & LEADERSHIP 6 ROLES

Control over quality, staffing and progress. Quality control and quality assurance stay separate.

Quality Controller	Performs product and process checks and blocks or reports deviations to procedure.
Quality Assurance Coordinator	Supports quality systems, procedures, records, deviations, audits and improvement.
Production Planner	Plans orders, capacity, materials and lead time and coordinates changes.

Production Preparation Coordinator	Prepares work orders, instructions, materials, resources and production data.
Working Production Foreperson	Works alongside the team and monitors pace, safety, quality and handover.
Production Team Leader / Shift Leader	Leads a shift and monitors staffing, safety, output, quality and improvement.

FOUR WAYS TO WORK WITH US

01 Temporary staffing Flexible capacity aligned with the assignment and schedule. Peaks, absence, flexible shifts and short-term deployment.	02 Secondment Skilled people for an agreed period and scope. Longer assignments, projects and continuity.	03 Recruitment & selection Targeted recruitment for a sustainable permanent match. The candidate joins the employer directly.	04 Project teams & flex pools A scalable deployment structure with planning and quality control. Multiple roles, sites, shifts or recurring demand.
